RI Approach Conceptual 7-07.doc

Folks,

In trying to sharpen up our RI goals with the City, Tom R and I put together the attached conceptual path forward for the Outfalls Project. The goal was to be able to ensure our current efforts are on the right track, and to focus upcoming work on the project as we near RIFS milestones in the coming couple of years.

I shared this with Rick, and will soon share it with Dawn and co, but wanted to also get your feedback and input to it before I go into a big discussion with the City on it.

(b) (6). If there is a chance I could get your thoughts by Friday the 20th (1 week), then I can have Dawn and co chew on it while I am away.

Thanks
